

ILIOS, THE COMPANY

ILIOS, THE COMPANY

ILIOS entered into a development program and cooperation with the EV (Electric Vehicle) producer JINMA of Shandong (China). ILIOS B.V. is registered in Amsterdam (Netherlands).

The EV's under this program are 45 km microcars for street legal use by two persons. Three wheels (tricycles) cars minimize the rolling resistance, limit the turning circle and add to the fun factor. The costs of driving microcars are minimal.

The first model is the “**ILIOS 2P MICROCAR 2024**”.

ILIOS currently invests in an Electric Delivery Van for Delivery and Cargo-transport, which will be produced with an open cargo bed and as an closed version. Certification of the “**ILIOS EVD 2025**” for street legal use (85 km/hr) is anticipated in November 2024.
